

Safe Patient Handling Solutions

MCAULEY MEDICAL, INC.

THE NEXT GENERATION
OF POWERED LIFT AND
TRANSPORT HAS ARRIVED.
INTRODUCING...

SuperLIFT

SUPINE LIFT & STRETCHER

WE'VE TAKEN THE PAIN OUT OF PATIENT TRANSPORT

The new McAuley Medical SuperLIFT Patient Lift and Transport System requires little or no patient handling, resulting in both improved patient comfort and enhanced infection control. The push-button powered SuperLIFT can easily handle 500 lbs., and its powered variable footprint provides exceptional versatility.

Since a hospital patient is in a supine position the majority of the time, we've designed the SuperLIFT to comfortably move and transport your patient in that position.

Ideal for Cath Lab, IR, OR, Labor & Delivery and Transport Departments

The SuperLIFT uses custom disposable or reusable high-strength sheets that easily and quickly attach to the SuperLIFT frame. These sheets conform to the patient's body, unlike lift slings that force the body to bend and conform to their shape.

SPL 500-30: 30" inner dimension of patient hoop/frame
 SPL 500-33: 33" inner dimension of patient hoop/frame
 SPL 400-27: 27" inner dimension of patient hoop/frame shower system

ELEGANT, VERSATILE, POWERFUL – AND TOTALLY UNIQUE

The versatility and finger-tip power control of the SuperLIFT will make your job a whole lot easier; when you add the transport capabilities, you have a product unlike anything else available, anywhere. With the push of a button you can easily lift 500 pounds. And with the push of another button you can spread one or both sets of wheels to maneuver in surprisingly tight spaces.

Storage Options:

- Stores over stretcher or bed
- Can stack three in the same space as one hospital bed
- Can maneuver in tight spaces where typical stretcher will not fit

The SuperLIFT raises and lowers from 31" to 43", and the wheelbase expands and contracts from 74" to 98", at the press of a button!

Made with pride in the USA

FEATURES:

- 500 lb. lift capacity
